

# A note on **u4c**'s origins

**u4c** Capability is available to every Excel user *worldwide* as a *world-first* **NEW** Excel Capability that I release now, **39** years after creating it in **1987**.

I still remember how I needed two or three days to grasp how **AFC** could be applied. It was absolutely essential to complete the (voluntary) work I was committed to doing at the time, and mastering it became the foundation for everything that followed.

Across the decades since, I have used **u4c** continuously; case-hardening it over the long-term in demanding, real-world financial control environments that include:

- replacing the accounting systems of a major city hospital,
- the information hub of my own worldwide tea-exporting business in the 1990's,
- replacing the accounting systems of a group of property companies, and
- designing and installing a Microsoft Great Plains Dynamics accounting system for a major NGO working in AIDS eradication.

These extended years of live operational and personal use underpin the evolution of **u4c** Capability as a *reliable, proven* and *global* Excel asset and where its format has not changed in **39** years.

The creation of The **u4c** Members Course is founded upon this long experience.

*Hands-on* experience of working with any technical capability is *indispensable* for both its understanding and its application in high-pressure working environments.

*'Hands-on'* applies *equally* to understanding and grasping what advantage **u4c** gives to all who manage data for business management. *All* can quickly do this – in depth – by experiencing how **u4c** provides this in practice with *each* of the three YouTube videos:

- 1 **09** **u4c** for Top Management in **5 minutes**. at <https://youtu.be/x6tfCCsIS6w>
- 2 **11** Watch **u4c** Capability at work. at [https://youtu.be/MYN\\_FRAHw8](https://youtu.be/MYN_FRAHw8)
- 3 **16** **u4c** for HR & L&D operatives *worldwide*. at <https://youtu.be/BLIsa8I3Vuk>

We cannot truly grasp what **u4c** can do without viewing *such as* the above three videos.

Most PDF readers enable these three videos to be opened directly here from this PDF.

The **u4c** Members Course – training **u4c** Members to *install, maintain* and *use u4c* in real operational environments – is accredited by the CPD Standards Office in London:

Edwin Dougherty FCA  
Creator of **u4c** Capability
